KWS AVIATOR

HYBRID RYE

KWS Aviator is a forage-focused hybrid rye combining very high forage yield and biomass with strong winter hardiness and rapid early-season growth.

Quick Facts

Availability	Available
Use Type	Forage
Yield	Very high forage yield
Winter Survival	VG
Height	103 cm
Lodging	VG

Why It Stands Out

- **Very high forage yield**
- **Strong winter hardiness**
- **Rapid early-season growth**
- **High biomass production**
- **Excellent fit for double cropping**

Our Experience

A forage-focused hybrid rye with very high forage yield and biomass, strong winter hardiness and rapid early-season growth. Its combination of early growth and biomass production makes it a strong fit for double-cropping systems.

KWS AVIATOR

Published Agronomic Characteristics

Soil Types	All
Forage Yield	Very high
Winter Hardiness	Very high
Quality	High
Straw Strength	Very good
Root Development	Very large
Ability to Tiller	High
Early Vigor	Above average
Pre-head Biomass	Very high
Milk Stage Biomass	Very high

Management Recommendations

Ideal Seeding Depth	1.0 inch
Silage Seeding Rate	0.8 units
Grazing Seeding Rate	0.8–1.0 units
Seed Date	August - September
Total Nitrogen	120 lb N/ac
